Luiz Filipe Dourado Galiza

Born in 1988, Brazilian, married. I got my first official job in 2009 as a Software Developer. Before this, I used to do some web pages as a hobby. I tried to be a Technical Sales professional once, but, even though it was a good experience, I decided to turn back to my real passion which is software development.

Work Experience

Developer
Pitang Consultoria e Sistemas SA
Jan 2017 – Mar 2018

Using agile methodologies like Scrum and XP, I had the opportunity to participate in three projects with different teams.

The 3rd one was a web application with Angular 2, WCF and other technologies aiming to understand the impact of weather on clean power generation.
Angular 2+ | WCF | SQL Server | .Net 4.6 with C# | Castle Windsor (IoC) | AspNet MVC + WebAPI | Aspose | TFS | Scrum

The 2nd one was a system written in WPF aiming to control load forecasts.
WPF | VSTO | .Net 4.5 with C# | Castle Windsor (IoC) | Informix | TFS | Scrum

And the 1st one was an ASP.NET MVC system aiming to maintain official journal publications and to control the taking actions according to these publications.
jQuery | AspNet MVC | SQL Server | .Net 4.6 with C# | Castle Windsor (IoC) | TFS | Scrum

Technical Sales Specialist (APM)
Vectra Consultoria e Serviços Ltda.
Feb 2014 - Jan 2017

I was invited by Vectra to return for a Sales position since I was able to bring some clients in my first period onto this company.
As a result, we got a great contract where I oversaw the installation of CA Application Management in all IT Departments from all courts over my country, Brazil.

Developer
Instituto DS Mamirauá
May 2013 - Jan 2014

Responsible for the entire development of an Amazon trees extraction control system.
I chose to use Knockout as frontend (plus Bootstrap) and .Net 4.5 plus C# as backend. The database was SQL Server.

Developer
Vectra Consultoria e Serviços Ltda.
Sep 2011 - May 2013

I was contracted to develop a Web-based NOC support system. When the first version was delivered - which I wrote in ASP.NET Web Forms + C# + jQuery + SQL Server - my supervisors asked to me to mount a development team and to write the development process for the company, so I did it based on agile methodologies like Scrum.

Developer
Apply Solutions Ltda.
Aug 2009 - Sep 2011

Doing part of a development team for a quotation system written in ASP.NET Web Forms, SQL Server, jQuery and Report Viewer, I was able, after a while, to become the leader of this team due to my interventions in the project.

I also was responsible, as an outsourced professional, to create an architecture in Zend (PHP) for a CRM system to a company called Nagem.

Education

Postgraduate in Software Engineering *(2016 - 2018)*
Software Engineering - UNIBRATEC, Recife, PE, Brazil.
I had to stop this program in the last course (Android) due to delays from the institution, since my trip to Australia was already marked.

Systems Analysis and Development *(2008 - 2011)*
Análise e Desenvolvimento de Sistemas - UNIBRATEC, Recife, PE, Brazil.
